DETAILED ACTION

Response to Amendment

1. The amendment filed on 4/12/07 under is sufficient to overcome the Grzeszczuk reference.

Allowable Subject Matter

The registration of anatomical images and surgical instruments can be updated and verified through the many levels of registration mentioned including the mapping of relative fiducials and subsequent updating of transformations between the imaging device itself, the patient, the tracking system, and the calibration system to allow for a multiplicatively verifiable automated updated positioning calculation system for the tracking of an interventional instrument.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
